

Allergy Encasement

Thank you for purchasing the Savvy Rest organic allergy encasement. This product is made of organic cotton woven to a pore size of 4.5 microns, which will block entry of dust mites, pet dander, or bed bugs into your mattress or foundation.

NOTE: There will be some slack in the material, which can be smoothed to the sides of your mattress or foundation and will not affect product performance. See *Allergy Encasement Instructions* for installation tips.

Allergy Encasement Instructions

Serenity, Serenity Pillowtop & Tranquility mattresses

We won't pretend it's easy! Assume you're pulling a snowsuit onto a 150-pound toddler who's lying on his or her back. Here are some tips to make installation go better:

- 1) Line up a helper or two, especially for larger sizes.
- 2) Remove bedding and vacuum the mattress before installing, to reduce allergens.
- 3) Gather the encasement into folds at one end of the bed.
- 4) Slip the gathered material onto just 12" or so of the mattress to start, the way you would gather a sock or stocking onto your foot before pulling it up your leg. Line it up as evenly as you can.
- 5) Working together, with a person at each side, lift up the mattress a few inches and gently tug the encasement bit by bit (just 6" to 12" per lift) over the mattress.
- 6) Once the casing is on, smooth excess fabric toward the sides of the mattress.
- 7) Close the zipper carefully.

Savvy Rest foundation; Earthspring & Simplicity mattresses

These products do not bend, so installation is more straightforward.

- 1) Line up a helper for larger sizes.
- 2) Remove bedding and vacuum the mattress or foundation before installing, to reduce allergens.
- 3) Stand the mattress or foundation up on one end. For extra stability, lean it against a wall or door.
- 4) Gather the encasement into folds and place it at the top of the mattress or foundation.
- 5) Line up the corners of the encasement with the top corners of the mattress or foundation.
- 6) Check that seams are aligned, and begin to gently pull the encasement down over the mattress or foundation. Work slowly, tugging out slack as you go.
- 7) Place the mattress or foundation gently on the bed or frame.
- 8) Close the zipper carefully.
