
Care Instructions
Simple Fit™ Mattresses
Earthspring

PROTECT your mattress with a washable mattress pad under the sheet.

VACUUM your mattress regularly with a vacuum cleaner's hand attachment. This removes dust and microscopic debris and helps reduce the buildup of allergens.

SPOT-CLEAN the casing if necessary. Sponge the area with a sponge lightly dampened with a cold water and mild natural soap solution. Do not saturate. Air dry thoroughly.

ROTATE the mattress (head to foot) once or twice a year if desired. Do not flip.
